Organisation Mission	<p>ENEA, the Italian National Agency for New Technologies, Energy and the Environment is a public undertaking operating in the fields of energy, the environment and new technologies to support competitiveness and sustainable development. ENEA is mainly called upon:</p> <ul style="list-style-type: none"> ▪ to promote and carry out basic and applied research and innovation technology activities, also through prototypes and product industrialization; ▪ to disseminate and transfer technologies, encouraging their use in productive and social sectors; ▪ to provide high-tech services, studies, tests and evaluations to both public and private bodies and enterprises.
Main organisation activities in relation to Enerlin Project	<p>ENEA section "ENE TEC" works on Energy Final Uses. CORVO and ICELAB laboratories of ENE TEC, located in Ispra, are dedicated to energy/environmental experimental activities on components and systems for residential and service sector (e.g. household appliances and lighting systems)</p>
Role in the project	<p>ENE TEC - Ispra contributes to EnERLin scientific support. Main role will be on quality charter and related testing activities. ENE TEC will cooperate to provide technical content for promotional and training campaigns. ENE TEC will take part to assessment of carbon emission and energy savings resulting from CFL campaigns.</p>
